Iron and Steel Productive Capacity

It is well to face the fact squarely does not matter whether the date takthat there is a very large productive en for reckoning is January 1, 1914, or rapacity in pig iron and steel. During July 1, 1915. There was practically ine war there was no disposition to generally not increase in capacity during that growth that productive capacity year and a half. The present capacity by had greatly increased. Then it is about 45,000,000 gross tong a year was felt that conditions would have to in pig iron, 52,500,000 gross tone of the productive capacity is about 45,000,000 gross tone of the productive capacity in the productive capaci be very favorable after the war to give steel ingots and 40,000,000 gross tons employment to the capacity. There in finished rolled steel, in addition employment to the capacity. There in finished rolled steel. In addition was merely a hope that such conditions would obtain. It was hoped that 1,500,000 tous of rolled iron and 1,500-the world at large would be able to engage in construction work and consumption of steel generally and that we should have a large outlet through Between 1996 and 1916 there was no exports. It was hoped also that concluding the large would be employment throughout. A careful elements for level will states would be employment throughout. A careful elements for level will state the during the finite indicates that during the finite indicates the during the finite indicates that during the finite indicates the during the finite indicates the during the finite indicates that during the finite indicates that during the finite indicates the during the finite indicates that during the finite indicates the during the finite indicate

world is in a badly tangled condition, more of the capacity for about 55 per while as to condition; in the United cent of the total time. States we have what investors consid- It is all a question of time, howeve

These hopes, as to conditions, have calendar years both or 1896 and 1916 not been realized. The rest of the there was operation at 80 per cent or

States we have what investors consider wery high construction costs, hence there is an indisposition to engage in comployment for it is always found ponstruction work. Normally over the country "growing up" to the cament work in bridges, buildings, pacity. The industry finds ways of factories, power plants and the like, cheapening its product and broaden. There is room for a vast amount of ing its use. The producers do not sit such work to be done. We might hars still and walt for the depression to seem all the water power drive. It have were as what is rememsuch work to be done. We might har-still and wait for the deplession ness all the water power, drain all the blow over. There was what is rememswamps, irrigate all the arid land, in-bared as a very severe industrial devent a lot of things that would require pression of five year, duration, 1893 tactories to produce, electrify all the to 1898, yet in three of those years the railroads, make all the farms auto- production of pig fron made new cal-matic, and do various other things, endar year records. The year of low-The question is what we are in post- est production of pig from in that detion to do.

Tig from producing capacity has intraced by 35 or 40 per cent and steel showed lower prices, making capacity by 59 per cent. It

Will Have Commercial Value.

furnaces have been developed by the use of hydrogen.

Sulphur has always been an objec-tionable constituent of coke, and these

WEST PENN TO DO REMOVING SULPHUR FROM COKE BY A NEW **ALL HEAVY SHOP** AND SIMPLE PROCESS **WORK IN THIS CITY** Consists in Passing Hydrogen Gas Through the Coking Coal; Believed

Decision Means Continued Employment to Many Local from coke and thus making that prod-uct better adapted for a household fuel and also for work in the steel Men During Slump.

NINE CARS UNDER WAY

The West Pann Rai ways company days, as the supply of coal containing has made the Connelisville shop, its headquarters for all the heavy work less, the problem of getting rid of it has been the subject of experiments of the system in order to give it; for several years.

Dr. Airred R. Powell, of the Experiment is now being carried out, to getter with additional building, which has made the West Side works a busy in the current number of the Inverse. tas made the West Side works a busy in the current number of the Journal of Industrial and Engineering Chemis-

in the current number of the Journal place.

The railways company is now erecting all its own cars in this city. Some in the rolling stock was formerly purphased from car building companies. New machinery has been purchased and installed in the shops and cars are produce at the rate of one amonth.

The West Penn has a force of 135 men at work on the West Side. Re-

The West Penn has a force of 135

men at work on the West Side. Reputibing and repainting cars from the McKeesport, division is under way.

All the cars on the Tarontum division were only recently completed. Cars from Leachburg and probably from McDonald will also be overhauled. There are about 40 more men than assual on the present car shops force. In addition to the overhauling program the company is now building inne 700 type cars. The first of these will be completed and placed in service the first of next week. Another its in the paint shop and a third is in the paint shop and a thi

recting a fourth began today.

It is the plan of the railways comprove of commercial mass, may prove of commercial value.

The has been assisted in this repany to use the low type cars. He has been assisted in this re-riusively on the main line. It is the search work by the chemists of lead-only kind of car which will be built ing coke, and steel companies, who see

in it results of practical value When the present building program When the present building program is completed there will be 28 of the big middle entrance cars on the West Februines. There are nine of the 600 type cars and a few of the 200 types still in use. Let a the new ones are complete type of the new ones are complete type of the new ones are complete type of the new ones.

With P. & L. E. I Saturday will be long remer Saturday will be long remembered by Samuel W. Inks, general foreman of the locomotive department of the
